HARD HITTING TALK

Like his magazine column and books, Mark brings hard hitting talk about the right to bear arms for self defense to the nation’s airwaves. A one-of-a-kind program focusing on the right to carry concealed handguns, safety, training and everything else related to the right to bear arms for self preservation, Mark interviews some of the biggest nationally recognized names in the field of self-defense and tells the truth about concealed carry that the mainstream media simply ignores.
